CAREER OBJECTIVE

Aspiring Data Scientist passionate about data-driven innovation. Seeking opportunities to apply analytical and coding skills at leading tech firms like Google to solve real-world problems and drive impactful business decisions.

WORK EXPERIENCE

Data Science • Internship
Cognifyz Technology, Virtual

Sep 2025 - Oct 2025

completed Data Science internship from September to October 2025. This internship allowed me to tackle real-world projects and sharpen my skills through hands-on experience. The guidance and support from the team made the learning process smooth and motivating. I appreciate the chance to contribute meaningfully and grow professionally in such a dynamic environment. Grateful for this valuable experience and excited to carry these lessons forward in my career!

EDUCATION

B.Tech, Artificial Intelligence And Data Science
Government College Of Engineering,Kolhapur

2024 - 2027

Diploma, Information Technology
Government Polytechnic, Solapur

2022 - 2024

Percentage: 82.00%

Senior Secondary (XII), Maharashtra State Board Of Secondary And Higher Secondary Education
Science

2022

Swami Vivekanand Prashala, Arts And Science Jr. College, Jule Solapur

Percentage: 78.00%

PROJECTS

[Safe Dream Tour ↗](#)

Apr 2025 - Aug 2025

I built this to solve 25002 Problem statement of Smart India Hackathon by solving problems with functionality. While we weren't able to participate in Smart India Hackathon (SIH) this year, my team and I poured our heart into building this project. This journey wasn't about the destination. It was about the late nights, the collaboration, and pushing our skills in this to the limit. I'm incredibly proud of what we built and grateful to my amazing teammates. Even without the official stage, we learned, we built, and we grew. That's a win in itself.

Crypto Crash Game -

Jul 2025

Developed a real-time multiplayer "Crash Game" inspired by crypto betting platforms using Node.js, MongoDB, Express, and Socket.IO.

Key Features:

- Crash Algorithm using SHA-256 for provably fair multipliers.
- Real-time WebSocket communication to sync multiplier updates and player cashouts.
- Atomic MongoDB transactions for secure balance and transaction handling.
- Tested with Postman Collection for betting, balance check, and cashout APIs.
- Sample player data seeded via script using Mongoose.
- Simple HTML + JS client for testing the multiplayer interaction.

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, Socket.IO, JavaScript, Postman

Dream Drive - RIDE BOOKING WEBSITE

Jun 2024 - Jan 2025

Full Stack Project | PHP, MySQL, AJAX, JS, HTML/CSS Role-based system: Admin, Driver, User Live fare estimation & driver notification using AJAX OTP verification and real-time ride status updates Stored all booking data and driver actions in MySQL

SKILLS

- | | | |
|--------------|--------------------|--------|
| • Python | • CSS | • HTML |
| • JavaScript | • SQL | • PHP |
| • Algorithms | • Data Engineering | |

EXTRA CURRICULAR ACTIVITIES

- Typing speed: 40 WPM (English)
- Developed Full-Stack Responsive Websites
- Created AI-based Chatbots using APIs
- Gained SQL Mastery through hands-on projects and practice
- Fine Tuned Models
- Trained Ai Models
- 1.Typing speed: 40 WPM (English) 2.Certified Stenographer 3.Developed Full-Stack Responsive Websites 4.Created AI-based Chatbots using APIs 5.Gained SQL Mastery through hands-on projects and practice

ADDITIONAL DETAILS

- Proficient in SQL and data analysis. Passionate about solving real-world problems using code and data. Eager to contribute to innovative, growth-focused teams and enhance solutions through continuous learning and collaboration.
- Developed a full-stack responsive website using multiple APIs. Currently building a personal AI assistant. Passionate about tech innovation and eager to gain professional skills to turn ideas into impactful real-world solutions.
